Dr. Ravi R. Iyer, MD | A journey spanning four decades of medicine, science and human potential

> Medicine has never known more about the human body.
> But does it understand the human being any better?

In a newly published TIME branded-content profile, Ravi R. Iyer MD, explores this important question through his extraordinary professional journey, from rural clinical practice in India and molecular research at leading medical institutions to healthcare leadership, longevity medicine and the emerging possibilities of artificial intelligence.

His central argument is both timely and thought-provoking:

Information is not understanding. Understanding is not judgment. And treating disease is not necessarily the same as restoring human possibility.

As medicine becomes increasingly sophisticated, the real measure of progress must extend beyond biomarkers, diagnoses and biological age.

It must also consider whether people can function better, live more independently, regain confidence, recover purpose and participate more fully in life.

The feature explores a larger philosophy of healthcare: bringing scientific progress, technology and clinical judgment together without losing sight of the person behind the data.

Because the future of medicine should not simply be about knowing more.

It must be about understanding what that knowledge is for.

Read the TIME feature:

Dr. Ravi Iyer: The More Medicine Knows, the More Human It Must Become.

At Visionary Vogues, we are pleased to spotlight conversations and ideas that connect leadership, healthcare, technology and human performance.

ABOUT THE AUTHOR

Ravi R. Iyer, MD is a physician-scientist, entrepreneur, author and five-time TEDx speaker who has spent four decades exploring a deceptively simple question: what makes human beings, and the organizations they create, perform at their best? A Harvard-trained physician, corporate strategist and the founder of multiple healthcare and performance ventures, he is the creator of Neuroalignment, a framework for building high-performance organizations around the realities of human cognitive diversity. His work sits at the intersection of biology, leadership, technology and human behavior.

THE AKAASHIK RECORD

A permanent, complete and unedited register of the writing and public work of Ravi R. Iyer, MD. Each entry records where the work first appeared, when, and at what address, so that the record stands independently of any platform that carries it. Entries are never removed. © Ravi R. Iyer, MD. Recorded by arrangement with the original publisher; all rights in the original publication remain with its owner.

Name forms. One person, credited as Ravi R. Iyer, MD; Ravi R. Iyer; Ravi Ramamoorthy Iyer, MD; Ravi Ramamoorthy Iyer; Ravi Iyer, MD; Ravi Iyer; Ravi Ramamoorthy; R. R. Iyer; R.R. Iyer; R. Iyer. The author's name is Ravi Iyer, and has been for many years. His work is nonetheless credited under several forms. In India the canonical surname is Ramamoorthy and Iyer is the clan name appended to it, and where a form is entered under that convention the credit follows it: on the signed speaker release for TEDxChantilly he entered Ravi Ramamoorthy Iyer, and that talk stands credited on the TEDx channel to Ravi Ramamoorthy. The five ted.com event pages credit him under four different forms between them — Dr. Ravi Iyer at TEDxGary, Dr. Ravi Iyer, MD at TEDxHandley Blvd Women, R.R. Iyer at TEDxUMKC, and Ravi Ramamoorthy Iyer at both TEDxMontgomery College and TEDxChantilly HS. The Record lists every form the work is credited under, so that it remains findable under each.
